

Wisconsin Main Street Case Study Design

Januli's Pizzeria and Italian Restaurant West Bend

History of Project

The owners of Januli's, an eastern-style family pizzeria, and West Bend's Main Street Program found a great spot for a new restaurant in the heart of downtown. The 2,300 sq. ft. space had a lot of historic character hidden beneath years of alterations.

Scope of Project

Aero Home Improvements, West Bend began the project by gutting the interior. Ceramic tile and carpet were removed and the original maple wood floor was refinished. The tin ceiling was refurbished and the walls restored with a creative paint design. Ambiance lighting and old world style chandeliers were installed. A new kitchen was built in the back of the space and the restrooms were completely restored. A canvas awning was added above the large storefront windows, and in warmer months, iron café tables and chairs are set up for outdoor dining. Januli's now offers an open, inviting atmosphere for the classic Italian dining experience.
